

Restrictions for Carry-On Luggage

The following is a guideline of what is allowed (or not allowed) to be in your carry-on luggage. The Transportation Security Administration website (www.tsa.gov/traveler-information) should be reviewed for the most current information.

Do not pack or carry any empty containers.

Limit all liquids, gels, aerosols, and pastes to a maximum container size of 3.4 oz/100ml. This includes all shampoo, conditioner, hand sanitizer, hair gels, toothpaste, mouth wash, hair spray, aerosol deodorant, etc.

Any liquids in the carry-on must be in ONE quart-size, clear plastic, zip-top bag.

Remove your quart-size bag from your carry-on and place in the provided bin as you approach the security checkpoint.

If you don't follow the restrictions, they will throw items away. You may not be able to buy these items when you get to your destination. These items can be packed in your checked luggage without restriction.
