

MEET OUR MISSIONARIES DR. RALPH IZARD

DAY 4

Dr. Izard began traveling with Baptist Medical Missions International (BMMI) many years ago while he had his own private practice. During this time, he fell in love with providing free healthcare to people who could not afford to go to the doctor. Dr. Izard traveled with BMMI on many trips before the Lord opened the door for him to sell his private practice and become the Director of BMMI.

Dr. Izard will tell you, the best part of a medical trip really isn't about medicine at all. It is about the opportunity to tell many people about Jesus. During a medical clinic, we set up a special place just to tell the story of how much Jesus loves the people coming to the clinic. We tell each person how special they are to God, and we explain to them how to accept him as their Savior. The best part of BMMI is the number of people that have been saved that came to a medical clinic.

Dr. Ralph is 82 years old and has been the BMMI Director for 13 years. He is already planning teams to visit around the world during 2019. Will you pray for Dr. Izard as he leads our medical teams?
